ABOUT US:

PLAZALAFISH INTERNATIONAL is a registered company with head office at 20 Asa Dam road, opp NSITF office Ilorin.

The company has operated profitably in the business of fish farming production since 2016, and has grown from a single pond farm to a larger farmland of about 12 plots housing 16 different sizes of fish pond with production capacity of 300 tons of fish/year

And in its quest to market its farm produce, as majority of farm produce is lost to the hands of middle men, it successfully opened a fish plaza, with a sales outlets, of various types of fishes, from frozen foods, cold store, to live fish sales, and quality standard of fish processing and packaging unit. The first of its kind.

OUR PRESENT STAGE RESULTS

Our products have successfully penetrated the nooks and crannies of our country (Nigeria) and outside the country. The demand for our fish products has outgrown our present production capacity of 3000 kg/ month only in catfish processing, Aside other fish processing like panla, Titus, sawa, hake, and Tilapia.

OUR GOAL

In our stride to meet our customer's yawning and demands, we are expanding our business operations, to a world class processing firm, with a full automated packaging unit, additional processing machine, and attain a weekly catfish production of 4 tons/ week.

In order to achieve the above goals, the management decides to open short term investment windows for interested individuals/groups or corporate bodies.

Investor(s) is/are entitled to 30% interest plus initial capital payable at full expiration

SECURITY:

your investment is secure as listed below

1. **RISK:** what we are doing is low in risk from farm to processing firm (i) our farm is not in area prone to flooding, aside that is also guided by huge embankment, more so our source of water is a Dam and not a river, therefore Dam generally is protected from excessive water

2. **THEFT:** our farm is equipped with 24 hours surveillance cameras, and the farm area is now a residential area as development has caught up.

3. **ADULTERATED FEED:** We know based on our experience that profitability in fish farming starts with good feed, and that's why we stay put with one of the best quality feed producers in Kwara state (TJ feeds and fisheries) who is also our mentor. For more than 8 years of relationship we may be bold to say we have the best feed for our fish.

4. **ACCIDENT:** No distance is too short for enemy to wreak havoc, the distance between sales office and farm is less than 10 kilometers, therefore in case of any emergency, reinforcement, and help is in sight.

5. **PROCESSING AND SALES:** our processing is devoid of burnt and sales process is devoid of credit sales, we are not at risk of losing our money in any ways.

7. **RISK OUT OF OUR CONTROL:** As a business outfit we know that there are certain things that are beyond our limit of protection and carefulness, such as supervising government policies, Act of God and General Disaster etc. Therefore as a responsible firm we are guiding against all this in a form of little insurance framework, as conventional insurance companies are not reliable. Certain percentage of your investment is kept in the form of insurance such that at an emergency situation, liquidation or such unforeseen circumstances you are able to get your investment without stress all in company expense.

CONCLUSION

To achieve this projection we are calling you on board to eat with us the fruit of our dedication and diligence to our passion and innovation
Thank you.

The management
